Editorial

255 'Serious Games' for unboxing Global Digital Health policymaking
M A Godinho, A Borda, P Kostkova, A Molnar, S-T Liaw

Original research

- 257 Rapid cycle deliberate practice improves and sustains paediatric resident PALS performance
262 Assessing competency using simulation: the SimZones approach
268 Cost-effectiveness of a video game versus live simulation for disaster training
274 Early assessment with a virtual reality haptic simulator predicts performance in clinical practice
279 Educational impact of a pilot paediatric simulation-based training course in Botswana
284 The use of a stronger instructional design by implementing repetitive practice in simulation-based obstetric team training: trainees' satisfaction

Short reports

289 Simulating a self-inflicted facial gunshot wound with moulage to improve perceived realism, immersion, and learning in simulation-based airway management training

293 Students' perceptions of an in-house developed pharmacy serious game for professional skills training

In practice reports

- 297 Developing the mental health workforce to meet the physical health needs of people with a serious mental illness
300 Using simulation-based training to improve health conversations by developing motivational interviewing in clinical support workers
302 Simulation test: can medical devices pass?
304 Novel simulation-based human factors workshops for nearly qualified doctors
306 Lessons learnt from piloting paediatric patient-focused and family-focused simulation methodology in a clerkship objective structured clinical experience
308 Theatre LISTS: Learning from Incidents, finding Safety Threats with Simulation
