Volume 7 Issue 4 | BMJ STEL June 2021

Editorials

183 Deadly bias: a call for gender diversity in cardiac life support simulation training
   L Spagnol Silverman, R Fabi

185 Closing the gap: a call for a common blueprint for remote distance telesimulation

Original research

188 Biosensors, Biomarkers and Biometrics: a Bootcamp Perspective
   O P James, D B T Robinson, I Hopkins, A G M T Powell, C Brown, D M Bailey, R J Egans, W J Lewis, On behalf of Welsh Surgical Research Initiative

194 Latent safety threat identification during in situ simulation debriefing: a qualitative analysis
   S Shah, M McGowan, A Perosoniak

199 Rapid cycle system improvement for COVID-19 readiness: integrating deliberate practice, psychological safety and vicarious learning
   A K M Chan, J W Rudolph, V N M Lau, H M K Wong, R S L Wong, T S F Lo, G Y S Choi, G M Jeynt

207 ‘Sorry doctor. . .I didn’t hear that. . .’: phenomenological analysis of medical students’ experiences of simulated hearing impairment through virtual reality
   N McLaughlin, J Rogers, J D’Arcy, G Gormley

216 Shared leadership in tertiary care: design of a simulation for patient safety decision-making in healthcare management teams
   L Aufegger, E Soane, A Darzi, C Bicknell

223 Simulation versus live tissue training randomised trial for ECMO proficiency: is one better than the other?
   T Ma, T García-Choudary, A Staed, M Tyree, K Valdez-Delgado, N Caldwell, N Carr, M Bergman, H Dalavoy

230 ‘It is a different type of learning’. A survey-based study on how simulation educators see and construct observer roles
   S O’Regan, F Molloy, L Watterson, D Nestel

239 ‘What do speech pathology students gain from virtual patient interviewing? A WHO International Classification of Functioning Disability and Health (ICF) analysis
   A Miles, S Hayden, S Carrell, S Halpin, B Lok

Short reports

246 The Baby Shark (Songs Heard Affecting Resuscitation Kinetics) study
   R Singer, G Lee, T Davis, B Lawton, H Goldstein, A Tagg, R Fisher, D Roland, on behalf of Don’t Forget the Bubbles

250 Death notification: a digital communication platform for simulated patient-based training with medical students
   M Hughes, B Garsner, A Bonito, L Falvo, C Holgood, R A Ahmed

253 Practical reflections on a collaboration with healthcare consumers on the development of a simulation
   B Symon, R Edwards, S J Twigg, M C A Sarmiento, S Barwick
Clinical examinations for medical students during the COVID-19 outbreak: a simulated patient programme perspective
N Ngiam, G Yasol, D Li-Meng Goh

Failure modes and effects analysis to assess COVID-19 protocols in the management of obstetric emergencies
S Curtis, R Flower, L Emanuel-Kole, P Nadarajah

Systematic review
Simulation training in non-cancer palliative care for healthcare workers: a systematic review of controlled studies
J Tropea, R Bicknell, D Nestel, C A Brand, C E Johnson, S K Paul, B H Le, W K Lim

Letters
They’re called what?
D Nestel, P Murphy, L N Chianain, G Gormley

Digitalising medical education: virtual ward rounds during COVID-19 and beyond
A Hagana, R Behranwala, N Aojula, N Houbby

Using technology to bridge the gap for remote healthcare education during COVID-19
S Ghoman, M Cutumisu, G M Schmölzer

Apple Siri as communication conduit during COVID-19: between inside and outside the OR
A Zeidan, H T Abdelgellil, E Edwin, D Alqarni
