Correction: ‘Live Die Repeat’ simulation for medical students

The Editor and Publisher of BMJ STEL wish to highlight that both of these papers reference an outdated version of the Simulation Effectiveness Tool (SET), published in 2012 by Elfrink et al. (https://doi.org/10.1016/j.ecns.2011.12.001).

In the 2016 BMJ STEL paper by Sunga et al., the 2012 SET was modified by the authors without attribution, and renamed as mSET. The 2020 paper by Brazil et al. built on the 2016 paper and referenced the mSET.

The authors of the original SET published a modified version of their tool (SET-M) in 2015 which replaced the 2012 SET:

The SET-M is currently the most up-to-date version of the SET and is the only version of the tool that should be used. Permission to revise the SET-M should be sought from the lead author, Dr Kim Leighton.
